# FLOURS FOR PROFESSIONAL

# FLOURS FOR BREAD-MAKING

Molino Naldoni flours for bread-making originate from the milling of highly-selected, not genetically modified and mostly Italian wheat. Our flours were born from milling recipes made in order to fully satisfy every bread-making's necessity: nature of the dough, times of leavening and methods of production.

## Linea Verde - TYPE '00'

100% ITALIAN WHEAT

Flour with a medium strength, particularly suggested for the Italian traditional bread-making, for crunchy products, with a golden crust and a white crumb. It is excellent for every direct processing such as common bread. It is suitable for several sweet and savoury products, such as puff pastry, bakery products, pizza and focaccia bread.

**IDEAL FOR:** common bread, Marche filetta, twisted Ferrara bread, Mantovani or Barillini, Vienna bread, grissini and hard past.

**25 KG** EAN 8033011590361 | **5 kg** EAN 8033011590071

## Linea Marrone - TYPE '00'

"Strengthened" flour, produced with Italian wheat and a small percentage of Canadian wheat. It is easy to work with and it reacts well to the leavening. It is useful in the refreshment of biga starters prepared with stronger flours, it helps to support the endurance in the leavening of the basic preparations during the summer period. It lends to the products the typical golden colour in the crust and an intense white in the crumb.

**IDEAL FOR:** bread-making, sandwiches and small-sized bread, focaccia bread and pan pizza.

**25kg** EAN 8033011590408

### Linea Blu - TYPE '0'

100% ITALIAN WHEAT

Flour with a high elasticity, it is easy to work with and excellent for direct-method dough with short leavening times. It is ideal as refreshment for leavening bases made with stronger flours.

**IDEAL FOR:** big-sized bread loaf, Tuscan bread, montanaro bread, Ferrara crocetta, Marche filetta, piadina. Suitable also for bakery products, puff pastry and classical, whipped and sandblasted, tarts, etc...

### Durum wheat semolina - REGROUND

This reground semolina keeps the durum wheat's aromatic notes and it has a gluten composition which makes it suitable for the soft wheat flours in order to obtain bread products with big pores. It is useful during the kneading and also for the leavening base. It is workable even by hands and it is ideal for the production of fresh pasta; it can be used at 100% or mixed with a fresh pasta flour.

**IDEAL FOR:** Pugliese bread, focaccia bread and fresh pasta.

# FLOURS FOR PIZZA

Many pizzas, many flours. In our mill, we studied six types of pizza flours: Tina, Sofia, Lucia, Marì, Sciòre and Mix pinsa romana. Different recipes, doughs and leavening times demand different flours. In order to obtain these flours we chose the finest wheat, we mixed and milled it following our exclusive recipes, born from the constant dialogue with the greatest pizza chefs. The aim is answering, in a punctual way, to the needs of professionals and satisfying all the variations of that big Italian tradition called pizza.

W 200

P/L 0,60

protein >11,5%

## Tina - TYPE '00'

100% ITALIAN WHEAT

This flour is suitable for the preparation of pizza and medium-hydration doughs which are ready in a short time. It allows to obtain easily-chewable products and not rubbery.

**LEAVENING:** 12 hours in the refrigerator.

**IDEAL FOR:** round pizza, Genovese focaccia, crescente and other pan focaccia bread.

**25 kg** EAN 8033011590286 | **15 kg** EAN 8033011590569 |

### Scióre SEMI WHOLE-WHEAT TYPE '2'

Scióre is the virtuous mixing of a "semi whole-wheat type 2" milling and the choice of wheat with a high quantity of proteins. This combination brings, on the one hand, the aromatic and nutritional notes of the germ and, on the other hand, the plastic and fermentative endurance of the best grains. This allows to knead with a very high level of hydration and to extend the maturation phase for a lot of hours. The slow and extended process of the starters will ensure the formation of aromatic mixtures that will be released during the cooking stage.

**LEAVENING:** 48-72 hours in the refrigerator.

**IDEAL FOR:** rustic and fragrant Neapolitan pizza, pizza on a peel, round pizza.

**25 kg** EAN 8033011590651

### Sourdough starter Pizza Plus

Completely genuine, it is excellent in order to lend to the dough a light consistence. With Pizza Plus the pizza will be crunchy, fragrant and more digestible.

**1 kg** EAN 8033011590972

### Spolvero for pizza

It is a particular mixture of flours, studied in order to simplify the kneading of the dough on the counter. It helps the dough not to be sticky and to slide better on the counter. It appears to be better even the pizza's crunchiness and colour.

**10 kg** EAN 8033011590491

### Mix pinsa romana

Soft wheat flour type "00", rice flour and reground semolina work together in order to ensure to the typical Roman pinsa outer crunchiness, inner softness and an important proofing.

**IDEAL FOR:** Roman pinsa.

**25 kg** EAN 8033011591115

# FLOURS FOR PASTRY

A different strength for each one of the four flours for the professionals of the Pastry, made to satisfy all the sweet products, from cookies to the big-risen products. Flours "0" and "00" with a high and constant quality: Ginevra and Nizza, two "Italice" originated from the exclusive milling of Italian wheat from a controlled supply chain. Praga and Vienna, flours able to sustain the most important risen products, obtained from the milling of selected strong wheat mixtures. Ginevra, Nizza, Praga and Vienna were born from the continuous discussion with the Pastry Chef and from a careful listening to the sector's needs and its constant evolution.

W 120

P/L 0,45

protein >11%

## Ginevra - TYPE '0'

100% ITALIAN WHEAT

This flour is characterised by a low content of non-water-soluble proteins and it is suggested for products with a high friability, in which the leavening takes place chemically or physically.

**IDEAL FOR:** printed biscuits, cast biscuits and wire cutting; classical, whipped and sandblasted shortcrust pastry; sponge cake, biscuit pasta, savoiardi biscuits.

25 kg EAN 8033011590330

W 250

P/L 0,60

protein >12%

## Nizza - TYPE '0'

100% ITALIAN WHEAT

Flour which is very extensible and is ideal for the preparation of classical pastry products. In the organic leavening, it is excellent if used in purity for short-medium fermentations; if mixed, it is useful in order to dilute stronger flours.

**IDEAL FOR:** sponge cake, bignè, doughnuts, bomboloni and risen viennoiserie, sweet and savoury puff pastry.

25 kg EAN 8033011590323

W 350

P/L 0,55

protein >14,5%

## Praga - TYPE '00'

Flour with an elevated strength and very extensible thanks to the high protein content; it is excellent for every dough that, other than the sugar load, has to sustain the fat and fruit load.

**IDEAL FOR:** croissants, sweet spianata, danesi, maritzozzi, puff pastry, big risen products such as panettoni, pandori and colombe.

25 kg EAN 8033011590217

W 440

P/L 0,60

protein >16%

## Vienna - TYPE '00'

Flour with an elevated strength. The particular content of glutenins and gliadins which characterises this flour ensures stability during the kneading stage, allowing to reach high hydration levels and big loads of air. The flour par excellence for the viennoiserie, even if used the cold technology.

**IDEAL FOR:** viennoiserie, big risen products such as panettoni, pandori and colombe.

25 kg EAN 8033011590316

# FLOURS FOR PIADINA

As every recipe of the tradition, even the piadina has its variations and our flours satisfy all of them. Thin as the Riminese or thick as the rustic, the piadina's dough has to be flexible and not oxidise. In this way the piadina will be pure white, friable and crunchy, with its typical bubbles on the top. Our flours Ideale per Piadina and Linea Blu have been studied respectively for the thin and the rustic version and both of them originated from the milling of chosen Italian wheat.

W 170

P/L 0,55

protein >12%

W 190

P/L 0,80

protein >11%

## Ideal for Piadina TYPE '00'

100% ITALIAN WHEAT

Mixture of type "00" flours, ideal for the dough of the fresh Romagna piadina "alla riminese", which has to be thin, pure white and flexible, the most suitable for the roll. With this flour, it is possible to obtain doughs which preserve their bright colour, characterised by a high friability and produce the typical bubbles during the cooking stage.

**IDEAL FOR:** Romagna piadina "alla riminese".

**25 kg** EAN 8033011590224 |  
**5 kg** EAN 8033011590033

W 200

P/L 1,00

protein >11%

## Ideal for Piadina Plus TYPE '00'

100% ITALIAN WHEAT

Mixture of type "00" flours, ideal for "alla riminese" piadina even more white and flexible because it protects the dough from the oxidative processes. Even this mixture ensures a high friability and the generous formation of the typical bubbles during the cooking stage.

**IDEAL FOR:** Romagna piadina "alla riminese".

**25 kg** EAN 8033011590224

## Linea Blu - TYPE '0'

100% ITALIAN WHEAT

With this flour it will be hard not to respect the golden rule of the Romagna piadina industry "knead not too much". In fact, it is excellent for direct doughs with short rest times, that will result particularly extensible and very easy to work with.

**IDEAL FOR:** typical Romagna piadina, thicker and amber yellow-coloured.

**25 kg** EAN 8033011590460

# FLOURS FOR FRESH PASTA

Our land, Romagna, is the culture of an excellent fresh pasta and the flours we designed for it were born from an authentic culture. Endurance during the cooking stage, right pores and the golden coloration of the pasta, extensibility and uniformity of the dough are the most important aspects to consider while creating the perfect mixture of wheat and the milling of a flour for fresh pasta.

And, as always, at the base of our flours there is a careful choice of the finest wheat, rigorously Italian, milled in purity for a dough that immediately stands out for its fragrance.

W 190

P/L 1,00

protein >11%

Ideal for Fresh Pasta  
TYPE '00'

100% ITALIAN WHEAT

The elevated absorption's capacity of the liquids denies the formation of clumps and its particular granulometry ensures the rough effect to the pasta. With this flour, it is possible to obtain pasta which preserves for several days its natural coloration, without oxidising and then turning grey. The pasta will be flexible till the right point and it is useful both for the machine processing and the manual one. These characteristics make it the perfect flour for every kind of soft wheat pasta (even stuffed).

IDEAL FOR: fresh pasta, long and stuffed.

25 kg EAN 8033011590118 | 15kg EAN 8033011590590 |  
5 kg EAN 8033011590088

Ideal for Fresh Pasta  
TYPE '00' - CALIBRATA

This flour has a calibrated granulometry which ensures to obtain the rough effect even with the intense mechanical processing of the wire-drawing. The final product will have a high capacity of collecting the sauce.

IDEAL FOR: fresh pasta, wire-drawn fresh pasta.

25 kg EAN 8033011591078 | 5 kg EAN 8033011590125

protein  
>12,5%

### Durum wheat semolina

This semolina is obtained from the milling and the sifting of the finest durum Italian and foreign wheat, with an amber-yellow coloration. It is the best in the production of dried pasta and it can be used in purity or mixed with fresh pasta flour, worked by hand or with the help of mechanical equipment. If used mixed, it lends to the pasta a particular roughness and a better endurance during the cooking stage, thanks to its protein contents, for a pasta always "al dente".

**IDEAL FOR:** dried pasta, fresh pasta worked industrially.

**25 kg** EAN 8033011590279 | **5 kg** EAN 8033011590446

# ORGANIC FLOURS

In a range of flours which want to answer to every professional's needs, two organic flours, such as the Stone-ground flour and the ancient Khorasan wheat flour, could not be missing.

The accurate choice of the raw material and the typology of the milling make these two flours particularly rich, able to return products with an intense aromatic taste.

The two organic stone-ground flours are a Molino Naldoni product but naturally milled and packaged in the organic-designed plant "Farinaria" in Marzeno di Brisighella.

W 160

protein >12,5%

W 230

P/L 0,70

protein >12%

## Organic stone-ground flour

### TYPE '2'

100% ITALIAN WHEAT

This is a type "2" flour, which contains a small part of the cortical portions of the grain. The stone-milling with an only solution and no intermediate sifting ensures a better remixing of the contents of the grain. The oils of the germ, absorbed by the grain, enrich this flour with aromatic notes. The fiber keeps the bread products soft for a long time, while the bran part lends an intense flavour which is released during the baking stage of products as the flatbread. This flour is excellent as a partial refreshment of other flours, in order to intensify flavours and taste.

**IDEAL FOR:** big-sized bread, pizza, whole-wheat biscuits, rustic doughnuts and other bakery products.

**25 kg** EAN 8033011590309

W 230

P/L 0,70

protein >12,5%

## Organic stone-ground flour

### WHOLE-WHEAT

100% ITALIAN WHEAT

This flour is stone-milled, without any intermediate sifting, and it is characterised by a rich flavour due to the germ's oils absorbed by the grain during the re-mixing stage. The important presence of the cortical parts lends to the product a high nutritional value. Thanks to the elevated presence of fibres, the bread products will be kept soft for a long time, while the bran part, when baked, will release its flavours. It is excellent as a partial refreshment of other flours in order to intensify flavours, taste and nutritional intake, in every kind of classical bread products.

**IDEAL FOR:** big-sized bread, flatbread, whole-wheat biscuits, rustic doughnuts and other bakery products.

**25 kg** EAN 8033011590309

## Ancient wheat flour ORGANIC KHORASAN

100% ITALIAN WHEAT

This flour is obtained from the milling of organic Khorasan, ensured by the brand Santa Candida and it is excellent for the production of whole-wheat bread products, which do not need too much fermentative strength. This ancient wheat, rich in amino acids, vitamin E and selenium, is also an optimal antioxidant and lately it became a substitute to soft wheat for those who have food intolerance. It is excellent as a partial refreshment of other flours, in order to intensify flavours and taste.

**IDEAL FOR:** flatbread, grissini, whole-wheat biscuits, rustic doughnuts and other bakery products.

**25 kg** EAN 8033011590484

# SPELT FLOURS

In order to enrich the production of every bakery with rustic and intense flavours, we prepared two spelt flours, born from an accurate choice of the most ancient wheat. This kind of flour has elevated nutritional qualities, it is source of proteins, iron, vitamins, mineral salt and selenium and it has a caloric intake lower than wheat's, while it still has a very high nutritional value. Spelt flour is available both white and whole-wheat, in order to answer to every nutritional need and aromatic intensity.

## Spelt flour WHITE

100% ITALIAN WHEAT

This flour is obtained by the type of spelt more suitable for the production of bread and pizza; it keeps the interesting nutritional characteristics of the ancient grain from which it comes and at the same time it easily gives back big pores in the risen products.

**IDEAL FOR:** bread, pizza, pastry and other bakery products.

**25 kg** EAN 8033011590781

## Spelt flour WHOLE-WHEAT

100% ITALIAN WHEAT

The whole-wheat processing of this spelt flour allows to preserve at 100% the cereal's principles of derivation, ensuring excellent results in the preparation of bakery products.

**IDEAL FOR:** bread, pizza, pastry and other bakery products.

**25 KG** EAN 8033011590781

# OTHER CEREALS FLOURS

We also offer flours and specific components which derive from the milling of different cereals. They are packaged and provided mostly in 25 kg bags.

## 10 cereals flour

A mixture of flours, flakes and seeds, balanced as for the taste and able to lend the typical aspect of the black bread. The toasted barley and bran of this flour ensure, in fact, a rustic aspect and an intense aromatic flavour to the products. Since it is a mixture, it can be used both in naturally and chemically leavened doughs.

**IDEAL FOR:** bread, pizza, focaccia bread, biscuits, bakery products and piadina.

**AVAILABLE ALSO IN:** 1kg bags

## Multi-cereals flour

A mixture ready to be used, ideal in order to obtain products with a high nutritional value. In this flour, the flavours of the soft wheat, barley and oat are intensified with the juxtaposition of sunflower and sesame's seeds.

**IDEAL FOR:** fast preparation of doughs with a direct method.

## Malt flour

This flour was born from the germination of the soft grain and its consecutive milling, and it is a malted flour with a high diastatic power. If added to the dough's flour (0,5...1,5%), it facilitates the leavening's process. It is suggested the higher dosage in small and poorly hydrated pieces of dough, while lower dosage for big and highly hydrated doughs.

**IDEAL FOR:** bread, pizza, grissini, focaccia bread and sweet risen products.

## Barley flour

This flour has a low glycemic content and a high vitamin and salt content; it has qualities which are similar to those of the wheat and it can be used by itself or, in case of preparation of bread products, mixed with soft wheat flours.

**IDEAL FOR:** bakery products.

## Vital wheat gluten

Protein extracted from the grain, with an elevated capacity of absorbing water. It is an excellent thickening for the culinary products and also as a support for the traditional flours, in order to implement the elasticity and the viscosity of the dough.

**IDEAL FOR:** soups and sauces, budini, mousse, seitan and other vegan food.

## Fioretto corn flour

This flour is obtained from the milling of the corn, it has a good energetic intake and it is naturally without gluten. It has a thin granulometry, which lends to the final products a consistent and smooth output. It is used in purity, but also mixed with wheat flours.

**IDEAL FOR:** soft and dirtied polenta, tacos, crespelle, amorpolenta.

**AVAILABLE ALSO IN:** 1kg bags

## Bramata corn flour

It is different from the fioretto because it has a rougher milling which lends to this flour a thicker granulometry with longer cooking times and more rustic and solid results.

**IDEAL FOR:** compact and rustic polenta, tacos, crespelle, amorpolenta.

**AVAILABLE ALSO IN:** 1kg bags

## Spelt flakes

In order to obtain the flakes, first of all the spelt grain is washed, softened with a short steaming and then pressed. The flakes are a source of fibres and with a good protein value, they also are versatile and can be used naturally (for example for healthy breakfasts) or with various types of processing and to enrich the bread products.

**IDEAL FOR:** muesli, salads, soups and creams, bread products.

## Rice flour

Flour with no gluten, but with a high content of starch which makes it an excellent thickening. It can be used for non-risen products or with the help of a chemical starter.

**IDEAL FOR:** biscuits, food for celiac disease, budini, recipes of the eastern tradition.

**AVAILABLE ALSO IN:** 5kg bags

## Rye flour

High content of fibres, potassium, phosphor and iron and a low gluten value. It is used in purity in bakery products when supported by acid pasta or sourdough starter. It can be mixed with other flours richer in gluten, in order to lend to the products a marked flavour and the typical brown colour.

**IDEAL FOR:** black bread, grissini, crackers, cakes and biscuits.

## Oat flour

With a high energetic value and high fibre contents, this flour is excellent if mixed with other soft wheat flours, in order to hasten the fermentative processes.

**IDEAL FOR:** classical bread products, pizza, focaccia, biscuits, plumcake and doughnuts.

## Oat flakes

These flakes are purified, or rather separated from the bran parts hard to digest; then they are shattered, steamed and slightly toasted. The oat flakes ensure a high intake of carbs, a good quantity of fibres and they are an excellent source of vitamin B1, phosphor and iron.

**IDEAL FOR:** muesli, granola and porridge.

## Buckwheat flour

It is naturally without gluten, with high protein contents and rich in selenium, zinc and magnesium. It can be used in purity for products which do not need leavening, or mixed with other flours in order to lend to the products rusticity.

**IDEAL FOR:** rustic biscuits, buckwheat cake, pizzoccheri, manfrigole, polenta taragna.

## Broken wheat

It is obtained from the first breaking of the soft wheat in the mill, and the broken wheat can be used in the dough or as a garniture in order to intensify flavour and taste and lend to the products a rustic aspect.

**IDEAL FOR:** bakery products.

**AVAILABLE ALSO IN:** 15kg bags

# FLOURS FOR HOME CONSUMPTION

## TYPE '00'

100% ITALIAN WHEAT

Flour with a medium strength, particularly suggested for the Italian traditional bread-making, for crunchy products, with a golden crust and a white crumb. It is excellent for every direct processing such as common bread. It is suitable for several sweet and savoury products, such as puff pastry, bakery products, pizza and focaccia bread.

**IDEAL FOR:** bread, cakes, desserts, doughnuts and bakery products.

**1 kg** EAN 8033011590057

P/L 1,00

protein >11%

## Ideal for Fresh Pasta TYPE '00'

100% ITALIAN WHEAT

This flour allows to obtain rough pasta and with no clumps, which collects well the sauce. It is excellent for dough which expands to the right point. It is suitable both for machine and manual processing.

**IDEAL FOR:** fresh pasta, long and stuffed.

**1 kg** EAN 8033011590026

W 200

P/L 0,60

protein >11,5%

## Ideal for Pizza TYPE '00'

100% ITALIAN WHEAT

Flour suitable for the production of pizza and medium-hydration doughs which mature in short times, and it allows to obtain soft and easily-chewable products.

**LEAVENING:** 6-8 hours at room temperature.

**IDEAL FOR:** pan pizza, "pizzette" and focaccia bread.

## TYPE '0'

100% ITALIAN WHEAT

The most versatile and demanded flour between our bread-making flours, with a medium strength, it is excellent as a base for several preparations and as a refreshment for yeasts. It is excellent for every direct processing such as common bread. It is suitable for several sweet and savoury products, such as Brazadela (Romagna doughnut), bakery products, shortcrust pastry, sponge cake, pizza and focaccia bread.

**IDEAL FOR:** bread, grissini, doughnuts and other bakery products.

### Ideal for Piadina TYPE '00'

100% ITALIAN WHEAT

Mixture of type "00" flours, excellent in order to obtain a thick, golden and fragrant piadina, typical of the Romagna tradition. With this flour, it is possible to achieve a dough which preserves its brilliant colour because it does not oxidise. The product will be friable and will develop the typical bubbles during the cooking stage.

**IDEAL FOR:** typical Romagnola piadina.

### WHOLE-WHEAT

100% ITALIAN WHEAT

This flour is obtained by the whole-wheat milling of soft Italian wheat, and it is excellent for the preparation of products which do not need long-leavening times, but it can also be used for the preparation of rustic "filone" if supported by a good leavening base. It can be mixed with other flours in order to intensify the fragrance and the taste of the products.

**IDEAL FOR:** flatbread, grissini, classical bread products, whole-wheat biscuits, rustic doughnuts.

**1 kg** EAN 8033011590675

### SPELT FLOUR

100% ITALIAN WHEAT

Ancient wheat with elevated nutritional qualities, source of proteins, iron, vitamins, mineral salt and selenium. It has a strong anti-oxidant action and a high nutritional value, while it has a caloric intake lower than that of the wheat; this spelt flour has a controlled and certificated supply chain.

**IDEAL FOR:** sweet and savoury bakery products, bread, crackers, grissini, pizza, piadina and all the dried pastry products.

### Stone-ground flour TYPE '1' - Organic

100% ITALIAN WHEAT

The stone-ground flour keeps an important presence of the cortical part, which lends to the product a high nutritional value. Thanks to the elevated presence of fibres, the bread products will be soft for a long time, while the bran part, when toasted, will release its flavours. It can be used mixed with other flours in order to intensify the flavour and the taste of the products.

**IDEAL FOR:** bread, pizza, whole-wheat biscuits, rustic doughnuts.

**1 kg** EAN 8033011590347

### TEN CEREALS

Flours, flakes and seeds in a mixture which ensures products with a balanced taste and a brown colour. The barley and the bran, when toasted, will be joining the different cereals' flours (soft wheat, durum wheat, oat, rice, rye,...), offering a rustic aspect and an intense aromatic profile.

**IDEAL FOR:** bread, pizza, focaccia bread, biscuits, piadina.

### KHORASAN - Organic

100% ITALIAN WHEAT

This flour is obtained by the milling of organic Khorasan, ensured by the brand Santa Candida, and it is excellent for the production of whole-wheat bread products, not particularly leavened. This ancient wheat, rich in amino acids, vitamin E and selenium, is also an optimal antioxidant and lately it became a substitute to soft wheat for those who have food intolerance. It can be mixed with other flours in order to intensify flavours and taste.

**IDEAL FOR:** flatbread, grissini, whole-wheat biscuits, rustic doughnuts.

**1 kg** EAN 8033011590415

### Le farine del Passatore: a 100% Romagnolo supply chain project.

Le farine del Passatore is the brand we designed to the flours with a supply chain traceability, and these flours derive from the exclusive grinding of zero mile Romagna wheat. A complex and ambitious project, which imposes the respect of a precise guideline by all the people who are involved: from the local factory which produces the wheat, to the storage center, up to us who mill the wheat.

A teamwork, which motivate us in order to obtain a more sustainable production. A project which boasts the supply chain certification UNI EN ISO 22005.

# CORN FLOURS

## Corn flour FIORETTO

100% ITALIAN CORN

This flour is obtained by the milling of the corn, it has a good energetic intake and is naturally with no gluten. It has a thin granulometry, which lends to the final products a smooth and homogeneous rendering. It is usually used in purity, but also mixed with other wheat flours.

**IDEAL FOR:** soft and dirtied polenta, tacos, crespelle, amorpolenta cake.

**1 kg** EAN 8033011590866

## Corn flour BRAMATA

100% ITALIAN CORN

It is different from the fioretto because it has a rougher milling, which then gives it a thicker granulometry with longer cooking times and results more rustic and thicker.

**IDEAL FOR:** compact and rustic polenta, tacos, crespelle, amorpolenta cake.

**1 kg** EAN 8033011590859

## Corn flour INSTANT

This flour, obtained by the milling of the pre-steamed corn, is ideal for the fast preparation, ready in a few minutes.

**IDEAL FOR:** instant polenta.

**Ideal for Fresh Pasta TYPE '00'** 100% ITALIAN WHEAT

The high capacity of liquids' absorption prevents the creation of clumps and the particular granulometry ensures the rough effect to the products. With this flour it is possible to obtain products which will keep their colour without oxidising, for several days. It is flexible to the right point and it is suitable both for machine and manual processing. These characteristics made it the perfect flour for every kind of soft wheat pasta (even stuffed).

**IDEAL FOR:** fresh pasta, especially long and stuffed pasta.

**5 kg** EAN 8033011590088

W 200  
P/L 1,00

P/L 0,60  
protein >13,5%

**Lucia - TYPE '00'**

This flour is obtained by the mixture of type "00" flours with a good quantity of proteins and gluten and it is ideal for the preparation of pizzas with medium leavening times, even with a high hydration. It allows to achieve a soft and well-workable dough. This flour is excellent in the preparation of biga starters and poolish and it can be mixed with the reground durum wheat semolina.

**LEAVENING:** 36 hours in the refrigerator.

**IDEAL FOR:** Neapolitan pizza, pizza on a peel, round pizza, Pugliese focaccia.

**5 kg** EAN 8033011590538

W 350  
P/L 0,60  
protein >14%

**Mari - TYPE '00'**

Mari is a mixture of type "00" flours which allows to obtain a soft and well-workable dough, with long leavening times and a very high hydration level, for results with big pores. It is excellent for the preparation of leavening bases, such as biga starters, poolish and sourdough.

**LEAVENING:** 48-72 hours in the refrigerator.

**IDEAL FOR:** Neapolitan pizza, pizza on a peel, round pizza.

**5 kg** EAN 8033011590521

protein >12,5%

**Durum wheat semolina**

This semolina is obtained from the milling and the sifting of the finest durum Italian and foreign wheat, with an amber-yellow coloration. It is the best in the production of dried pasta and it can be used in purity or mixed with fresh pasta flour, worked by hand or with the help of mechanical equipment. If used mixed, it lends to the pasta a particular roughness and a better endurance during the cooking stage, thanks to its protein contents, for a pasta always "al dente".

**IDEAL FOR:** dried pasta, fresh pasta worked industrially.

**5 kg** EAN 8033011590446

W 220  
P/L 1,50  
protein >12,5%

**Durum wheat semolina - REGROUND**

This reground semolina keeps the durum wheat's aromatic notes and it has a gluten composition which makes it suitable for the soft wheat flours in order to obtain bread products with big pores. It is useful during the kneading and also for the leavening base. It is workable even by hands and it is ideal for the production of fresh pasta; it can be used at 100% or mixed with a fresh pasta flour.

**IDEAL FOR:** pugliese bread, focaccia bread and fresh pasta.

**5 kg** EAN 8033011590453

# the mill

## LARGE-SCALE CRAFTSMAN SPIRIT.

Our new mill in Faenza, inaugurated in 2019 and certificated BRC, required a complex design work: 20.000 square metres of knowledges and technologies in a strict synergy, amongst silos, productive plants, packaging areas, warehouse and offices.

A step that became necessary on the one hand to answer the demand of an always more exigent market and, on the other hand, for the desire to turn out a centuries-old experience into a contemporary milling plant. Nothing gets lost if it is well transformed. Thereby our new mill becomes an important legacy for those who will come after us.

**20.000m<sup>2</sup>**  
total surface

**900m<sup>2</sup>**  
packaging area

**2.500m<sup>2</sup>**  
warehouse

**4.300m<sup>2</sup>**  
milling plant

The cornerstone of our productive equipment is a sophisticated system of machines distributed on more floors. We set it up and personalised it in order to obtain exactly what we desired: to recreate a dimension authentically artisanal, inside of an industrial summary. This is the reason why our flour is the same as that of 300 years ago.

The warehousing of the wheat and of the finished product ended up into the silos has been studied in order to ensure a constant quality and the production batches traceability.

We refined an innovative logistical system, thanks to our own vehicles, that allows us to guarantee faster and punctual deliveries.

*Welcome to our Mill!*

# the mill

## THE LONG JOURNEY OF THE GRAIN.

Over seven generations of experience we developed a highly perfected productive process, where a progressive technology meets the art of milling.

Moving quickly among floors, through a dense network of pipes, our grains are cleaned in the “tarara” machines, vibro-separated, cleared from stones, rid from every micro-residues through batteries of magnets, chosen from selected opticians.

Then the wheat is taken to the right level of hydration before being ground in the rolling mills, sifted in the plansichters, reground and resifted, until we obtain the perfect flour. Other than a specific mixture of wheat, every milling recipe has various steps in different rolling mills and sieves. During this gradual and progressive reduction of the granulometry, which consists of thirty steps without thermal stresses, every stage of the process is particularly important, even the last one: the maturation in the flour silos before the packaging. To each flour its time.

- **1. RECEPTION AND ANALYSIS OF THE WHEAT**

All the wheat entering our mill is submitted to a first entomologic check, then optical and olfactory. After that we check the contractual and qualitative parameters in order to complete the compliance.
- **2. CLEANING AND SELECTION**

The wheat is carefully cleaned, selected, and mixed following the specific “Naldoni recipes”.
- **3. CONDITIONING**

The caryopsis meet water in the “wheat-wetting”, a particular scrubber, which allows the optimal internal humidification for the milling and another external cleaning through a superficial peeling effect.
- **4. MILLING**

The wheat is rolled with care and without overheating, through pairs of counter-rotating cylinders, grooved and smoothed, increasingly finer as the granulometry decreases.

- **5. SIFTING**

From the rolling mills, the wheat goes to the plansichter, a sort of big mechanic sieve, made by frames with different holes, where bran parts are separated from those which will continue their journey through other rollings mills and sieves, until becoming the desired flour.
- **6. ANALYSIS OF THE FLOUR**

Before the packaging or the bulk cargo, every flour is controlled in the internal laboratory where the chemical-physical and rheological characteristics are examined in order to verify the compliance of the final product.
- **7. PACKAGING**

The packaging is totally automatic and it is made in bags of 1, 5, 15 and 25 kg. Every flour is also available in bulk.

# from mill to mill

## FARINARIA: THE ORGANIC CONCEPT BY NALDONI.

We had a dream: turning our historical plant in Marzeno di Brisighella into a 100% organic mill. We achieved it and we named it Farinaria.

The project of reconversion started only after the transfer of the production into the new plant in Faenza, which allowed us to dedicate the mill in Marzeno for the exclusive production of organic flours, ruling out every possibility of contamination.

A choice that reaffirms both our innate vocation to quality and the effort that we have been conducting, which is ensuring a product with healthy standards kept always higher through a controlled supply chain.

The wheat that we grind here is not only organic and certificated, but also Italian and zero-mile. Same philosophy of Molino Naldoni, same attention to the elevated organoleptic quality of the finished product.

At the quality of the organic wheat, it is added the knowledge and the experience in the milling and in the productive processes, which made us an example of Italian excellence.

In this context, it could not be missing a stone plant, where the ancient milling technique meets the innovation.
